Location:
Trondheim, Norway

Timeframe of Residency:
- Residency: 15-27 August
- Maker Faire: 26-27 August

Nordenfjeldske Kunstindustrimuseum

Institution Description:
The Nordenfjeldske Kunstindustrimuseum is a museum of decorative arts and design, situated in Trondheim, Norway - and is one of the units in Museene i Sør-Trøndelag. Its collection consists of more than 30 000 objects with special focus on Scandinavian Design, Japanese Craft, Textiles and Jewellery. Unique for the museum are two interiors designed by the museum by Henry van de Velde and Finn Juhl.

Residency Description:
This residency is scheduled so that its last days will coincide with the Trondheim Maker Faire, and a highlight of this residency is the enthusiastic involvement of the Trondheim maker community. To aid in the development of projects, the resident will have access to Trondheim Makers' "Mobile Maker Space," a 22-foot trailer filled with 3D printers, electronics, and other tools. The resident will be encouraged to present their work at the Trondheim Maker Faire, either as a completed project, a workshop, or other presentation.
The resident will be encouraged to "think outside the box," and help the museum imagine new ways that their diverse collection can inspire creativity. To facilitate this, the resident will be encouraged to engage with experts in a range of topics at the Nordenfjeldske Kunstindustrimuseum. Curators, educators, and registrars will make themselves available to discuss works in the collection, their history, construction, and context. The diversity of the museums collection, much of which is unencumbered by copyright, will provide ample opportunities for creative reuse and experimentation.

Exhibition space at Nordenfjeldske Kunstindustrimuseum

Trondheim Maker Faire

Resources to be made available:

- *Mobile Maker Space*: 22-foot trailer filled with Maker gear, for working on project.
- Collection and expertise of the Nordenfjeldske Kunstindustrimuseum: http://nkim.no/en
- Facilitation of participation in Trondheim Maker Faire

Expected outputs:

- A project may involve the creation of a physical object, but it is expected that some portion of the project involve direct public engagement in the form of a lecture, workshop, or performance. This may take place at the Museum or Maker Faire
- Preferred: a project presented at Trondheim Maker Faire
- The project diary: a daily log of residency activity. May be text, images, and/or video

Expected Skills and Experience:

- Experience working with closely with the public; running workshops, teaching skills, and/or interactive performance.
- Documented background in skills relevant to proposal
- Conversational Fluency in English
